Course Description:

This course introduces the major developments, key figures and significant works of modern art. Covering a period from roughly 1900 to the present, we will trace modernism’s unfolding in the avant-garde practices of the 20th century as it moves into postmodernism and contemporary art. Beginning with turn-of-the century European art (Art Nouveau and Vienna Secession), we will follow the development of Fauvism (Matisse), Cubism (Picasso) and German Expressionism (Kandinsky) up to the First World War. We will then chart the various modernist movements that arise between the first and second world wars (Dada, Surrealism, The Russian Avant Garde, De Stijl, etc.). In the wake of the Second World War we will then trace the shift from Paris to New York as the cultural center of the avant-garde, and the rise of Abstract Expressionism, its divided legacies through the 1960s and 70s, and examine the development of the post-modern debates of the 1980s and 90s. The class will conclude with a look at recent trends in contemporary art.

The course is designed to teach you to look thoughtfully and sensitively at works of art and to acquire some sense of their role and position within the time and place in which they were produced. You will learn to articulate how many different factors—visual, cultural, political, historical—come together in each work of art.

Course Hours:
The course has 20 lectures and 8 seminars/exercise classes in total. Each class session is 120 minutes in length. The course meets from Monday to Friday. Each course has a total of 56 class hours (4 credit hours).

Requirements:
Attendance and active participation in class, completing homework assignments and readings (20%); midterm exam (40%); final exam (40%). All assignments must be completed in order to pass the course.

Readings:

Assignments:
Each student is responsible for completing all of the assigned reading prior to class.

Examinations:
The mid-term and final exam will test how well you understand and analyze the works of art presented in class and discussed in the readings. Both exams will consist of three parts: slide identifications, multiple choice, and short answer questions.

The first part of the exam will consist of approximately 10 short slide identifications. To understand the history of art you must learn dates, periods and the titles of artworks and the artist name. This is the basic information of art history, and without mastering it you will be unable to gain a coherent understanding of the larger movements and issues. In every case, it is important that you learn dates by thinking of how that single work relates to its larger stylistic and cultural context. DATES MAKE SENSE!

While it is important to commit names, dates, styles, etc., to memory in order to master the
materials of this class, it is equally important that you do more than simply memorize the course material. In order for art history to be more than just an abstract set of historical facts, we must understand how and why works were created in a particular time and place, the circumstances and background behind them, the formal properties that constitute a given style and their continuing role in the subsequent history of art.
